PROFILE

Technical writer with 6+ years turning complex systems into clear, usable documentation. I write API references and developer guides while building full-stack web and mobile apps.

EMPLOYMENT HISTORY

Freelance Technical Writer & Full-Stack Developer

Oct 2023 — Present

- Produced documentation, blog posts, newsletters, social media content, and internal docs for SaaS clients including: ConfigCat, HoneyBadger, and Wisej.NET
- Delivered client websites and internal tools using modern frameworks, including [Quality Kilts](#) and [Sicamon](#)
- Solo-developed [Loquena](#), an offline-first, multiplatform Flutter app designed for neurodivergent children

Technical Writer

EVORA Global

Aug 2022 — Aug 2023

- Owned product and API documentation for the SIERA and SIERA+ ESG analytics platforms
- Created learning, onboarding, and newsletter content to support product adoption
- Standardised documentation templates across product and engineering
- Implemented a docs-as-code workflow with a CI/CD pipeline, so documentation ships with each release

Technical Writer & Support Engineer

Transloadit

Sep 2019 — Apr 2022

- Rewrote the API documentation using customer feedback, reducing integration friction for developers
- Created SDK guides and onboarding tutorials
- Guided clients through product integration, taking support calls, improving developer experience, and arranging enterprise pricing plans
- Wrote blogs, documentation, newsletters, product demos, and social media content
